## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment and remarks received 24 January 2007 have been entered.

### ***Claim Objections***

2. Claim 19 is objected to because of the following informalities: The term "groves" in the 5<sup>th</sup> line of the claim appear to be misspelled—i.e., should be *grooves* instead. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 28 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Newly added independent claim 28 includes a limitation that "each of the plurality of patterns is the same size as that of adjacent patterns." This feature is not described in applicant's original disclosure and the drawings do not clearly teach this feature, since there is no evidence that the drawings are drawn to scale.

***Allowable Subject Matter***

5. Claims 15-27 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: Claims 15-18 were allowed in the previous office action. The reasons are repeated in this office action.

7. Regarding independent claim 15, the prior art of record neither shows or suggests a plasma lighting bulb comprising, in addition to other limitations of the claim, a plurality of hexagonal patterns formed on an outer surface of the bulb due to an alignment of a plurality of grooves having a predetermined depth. Due to their dependency upon independent claim 15, claims 16-18 are also allowable for the same reason.

8. Regarding independent claim 19, the prior art of record neither shows or suggests a plasma lighting bulb comprising, in addition to other limitations of the claim, a plurality of grooves formed on an inner or outer surface of a bulb, wherein the plurality of grooves forms a plurality of polygon patterns. Due to their dependency upon independent claim 19, claims 20-27 are also allowable.

9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

***Response to Arguments***

10. Applicant's arguments received 24 January 2007 with respect to independent claim 19 have been fully considered and are persuasive. The rejection of claims 19-27 has been withdrawn.

***Conclusion***

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

12. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
